### **DETAILED ACTION**

A typographical error was made in the restriction requirement. Claims 9-11 were omitted from the election. These claims have been examined.

### ***Drawings***

The drawings are objected to because the text must be removed. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Specification***

The abstract of the disclosure is objected to because it contains legal phraseology (i.e., “means”). Correction is required. See MPEP § 608.01(b).

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4, 8 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. For example, the limitations in claim 1 following “whereby” are unclear. The term “the same level” is awkward and lacks antecedent basis; “runs through” does not appear to be a proper apparatus term; and “is placed” and “are provided” appear to be process type limitations within an apparatus claim. All recitations of “sheer” should be replaced with “shear.”

Further regarding claim 8, the second paragraph is generally a narrative process type recitation which is indefinite because it is unclear what is and is not within the scope of the claim.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Gassner et al. (U.S. Patent 3,103,025).

Gassner discloses a bridge including at least two lane girders (12, 13, 14) of triangular cross section with upper (15) and lower (71) chords. There is a roadway slab (11) and a connector (90) configured in the manner claimed (Figure 1, for example).

Regarding claims 2 and 7, there is no structure recited with respect to the “pusher rods.” The configuration of Gassner is broadly within the scope of this term. Similarly with respect to claim 9, there is no structure with respect to the “tensioning device” not met by Gassner. Also see the 112 2<sup>nd</sup> rejection, above.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gassner et al., as applied above.

Gassner does not teach hinged slabs; however, the examiner takes official notice that hinged slabs are known to use in order to facilitate transportation to a site. For this reason, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have used hinged slabs with Gassner.

***Allowable Subject Matter***

Claim 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
